Puzzle Eyecolor

\$13

New, Limited-Edition Color

In support of Autism Awareness month, every purchase of Puzzle Eyecolor helps support Bare Escentuals' donation to the Autism Research Institute through the BE Cares philanthropy program.

The Autism Research Institute (ARI) is a non-profit organization dedicated to conducting research, and to disseminating the results of research, on the triggers of autism and on methods of diagnosing and treating autism.

What is Autism? Autism is a severe developmental disorder that begins at birth or within the first few years of life. Most autistic children are perfectly normal in appearance, but spend their time engaged in puzzling and disturbing behaviors which are markedly different from those of typical children.

A special "Thank you" to Julie Swaim, who worked with Bare Escentuals Product Development Team to create Puzzle Eyecolor. Autism has touched Julie's family two times with her sons, Jackson (10) and Carson (8).
